

# DeLaval Multi Dose MD™

## Versatile Iodine Teat Sanitizer in a Concentrate

DeLaval Multi Dose MD represents a new wave of convenience. One product can create four different pre and/or post dip formulas – allowing you to use the right product at the right time for your cows. Multi Dose MD contains a blend of iodine – highly effective at killing 99.999% of most common mastitis-causing organisms, and emollients to help condition teat ends.

### Flexibility:

- Easy to change formulas to meet the needs of your dairy
- Appropriate for pre and post application needs
- May be used for dipping or spraying

### Convenience:

- Concentrated formula means less storage space required, fewer delivery trucks and less waste
- Product may be used immediately, or blended and stored for up to two months
- Formulated for easy use with DeLaval Dispensing Systems

## Four Distinct Formulations

With multiple formulations available, Multi Dose MD™ is ideal for year-round use on your dairy! As conditions change, your formula can easily change, too.

Iodine Concentrate	Emollient Concentrate	Application	Benefits
1%	10%	Post dip	Iodine is a broad spectrum germicide – fast acting and effective against the most common mastitis-causing bacteria as well as fungi, viruses, and bacterial spores. Emollient provides optimal skin conditioning.
0.75%	7.5%	Post dip	
0.5%	5%	Pre/post dip	
0.25%	2.5%	Pre dip	

## DeLaval Teat Dip Dispensing Systems

For best results, use Multi Dose MD with an automatic or manual teat dip dispensing system from DeLaval. Both units are designed and metered to dispense all four formulations of Multi Dose MD accurately and on-demand.

### DeLaval MDTD Manual Dispensing System

- Simple, easy push-button design
- Select and dispense the teat dip you desire
- Doesn't require electricity or air; water connection only

### DeLaval TD Automatic Dispensing System

- Dispense dip to the parlor from up to 200 feet away
- Attach up to eight spray connections
- Reduce your on-farm footprint of chemicals
